# HISTORY AND BUSINESS

Founded in 1980, **Guidoparma** was born as a specialized company in overhead railway systems maintenance.

In the following years **Guidoparma** has grown and became one of the leading companies in the whole production chain of overhead railway systems and equipments: design, construction and installation.

Today **Guidoparma** is one of the most important companies in both Italian and International markets, providing high quality and customized solutions for specific needs of any manufacturing company.

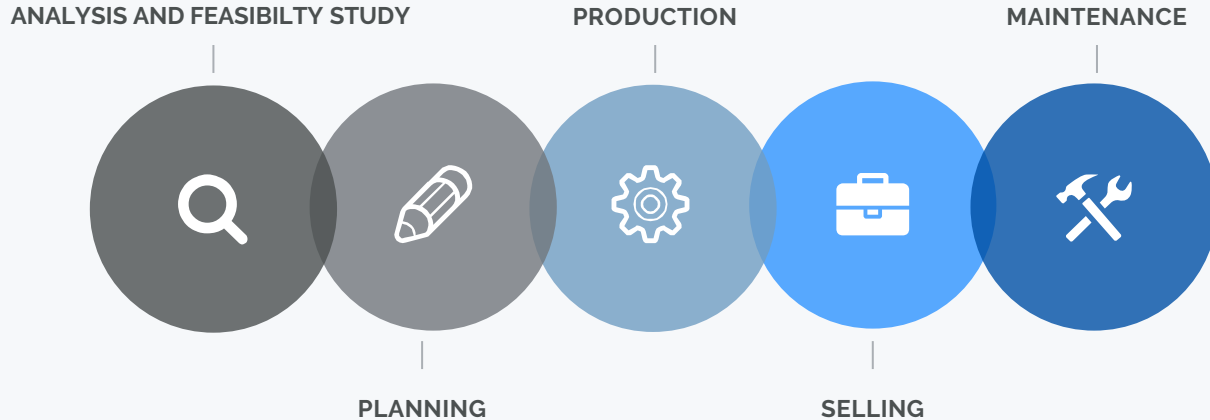

Our Office in Parma

---

# WORKFLOW

Experience and competence at all stages:

**Guidoparma** is structured to provide a complete service since the very first step of the project: from feasibility study to final delivery and customer care.

---

# PRODUCTS

## OVERHEAD RAILWAY SYSTEMS

**Guidoparma** specializes in design and construction of customized systems:

whatever the size of your factory, thanks to our proven overhead conveyor systems we can offer the best solution for handling products over different phases of the production chain.

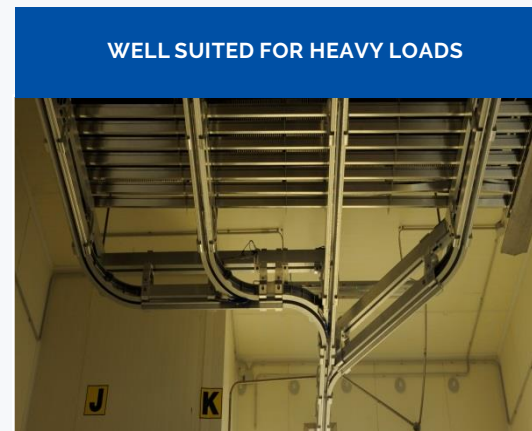

Safe and reliable for any load, O.R.S. are made out of aluminum or stainless steel.

# PRODUCTS

## EQUIPMENTS

In addition to railways, **Guidoparma** provides a range of equipments that can be installed according to the features of the products and the requirements of each phase of the process.

Customers may choose between two frames: **integrated** to the overhead railways or **self-standing** frames that rest on the floor.

# EQUIPMENTS

## INTEGRATED EQUIPMENTS

- lighter and more flexible in design
- can be moved with hands or automation (Railway Chain)

## FREE-STANDING EQUIPMENTS

- high carrying capacity
- suited for huge productions
- can be moved with hands or AGV systems

---

# PRODUCTS

AUTOMATION

**Guidoparma** also offers automatic systems for equipments handling that facilitates the operations of products loading and unloading:

# AUTOMATION

**Railway Lifter**

is able to lower a section of moveable rail to allow product loading to higher levels..

**Railway Chain**

Thanks to the chain with hooks integrated to the overhead railway, handling products can be continuous or adjusted in steps.

**Layer Manipulator**

Robotic arm to raise and lower the level of the frame with ease.

---

## CUSTOMER SERVICE

Once the installation of Overhead Railway System is completed, **Guidoparma** ensures a thorough assistance on any customer's requirement or problem.

**Guidoparma** also provides a complete maintenance program, which is critical factor for the long duration of railways systems and equipments.

---

## QUALITY AND CERTIFICATIONS

**Guidoparma** is certified ISO 9001:2008 from 2011 and works every day maintaining the highest quality standards.
